

Engineering Procurement, Construction, Installation & Commissioning

Company Profile

www.raybondtech.com

- One-stop shop for all your engineering solutions

Raybond Technical Ltd is a General Engineering solutions business fully backed and supported by first rated European engineering equipment and spares manufacturers. We have over 10 years of experience in engineering solutions and services in the oil & gas industries, mining, cement, food & beverages. we have also demonstrated capabilities in other industrial sectors like construction, pharmaceuticals and heavy industries.

We offer complete solutions for wear protection & welding, surge & lightning protection systems, lubrication systems, dozing systems, conveyor systems, water treatment plants and general services.

Our product range includes electric motors, pumps & valves, sensors & actuators, conveyors systems & accessories , lubrication systems & accessories, welding equipment, accessories & consumables, seals, bearings, and general engineering procurement.

Vision

To always be the choice engineering solution provider by making real what matters to our customers.

Mission

To become the leading, reliable partner with our customers providing sustainable solutions to engineering problems, from simple to complex projects, installation and maintenance services in Nigeria.

Core values

Safety

The safety of our workers is our number one priority and part of our work culture. We are committed to the highest standards of safety, consistent with sound Engineering practices

Integrity

We remain true to our founding values of quality, honesty and hard work. We have one of the highest ethical standards in the industry. Raybond Technical Ltd is a business based on trust. We are consistently associated with the highest standards of service, quality, personal attention to clients and integrity.

Teamwork

We recognize that our primary asset is people. To be successful, Raybond Technical Ltd must be a rewarding place to work. We therefore provide opportunities and encouragement to help our people reach their potentials. We work with clients as a team and mutual respect provides the foundation for our success.

What we do

- Global and Strategic Sourcing
- Diversified Engineering Services
- Project Planning & Management
- Process Improvement
- General Order Supplies
- Inventory Management

Major Applications for Wear Protection and Welding
Castolin Eutectic GmbH

Castolin Eutectic is today a worldwide leading company in maintenance, surface protection and special joining using welding, brazing and coating technologies. They provide proven, value-added solutions to global industries using advanced material technology. Through an international team of more than 400 qualified application specialists, we partner with our customers to reduce maintenance costs and increase productivity.

Franklin Electric product brands are grouped into distinct applications that make the most sense to customers, covering every function of water and energy from clean water, water transfer, wastewater, and energy systems. Franklin Electric Pioneer centrifugal pumps are the highest performing pumps on the market. They provide better flow, higher head, greater efficiency, and unparalleled service designed to meet unique clients' challenges.

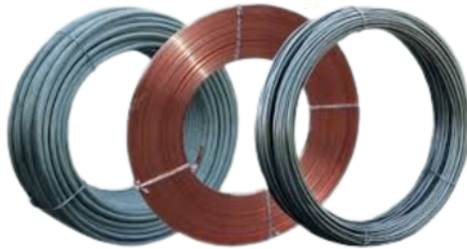

KNUTH's portfolio ranges from CNC and conventional machining technologies including lathes, mills, drilling and grinding machines to a wide variety of sheet metal working technologies such as laser, water, and plasma cutting machines, bending machines, shears and press brakes.

SAMSON is a German company known for its expertise in manufacturing control valves and other instrumentation solutions. Samson valves are widely recognized for their quality and precision in regulating flow, pressure and temperature in various industrial processes. The company's valves are commonly used in sector such as Oil and gas, petrochemicals. chemical processing, and power generation.

DEHN is a leading, international family-owned electrical engineering company based in Neumarkt, Germany. Dehn provides comprehensive solutions in the field of surge protection, lightning protection/earthing and safety equipment for process technology (Oil & gas, and chemical industry), Cell Site, Energy, E-Mobility, Railway and buildings. Our protection coverage ranges from battery energy storage system (BESS) and renewables to the protection of critical infrastructure and data centers.

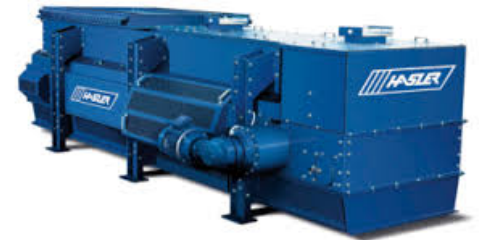

Lincoln SKF has refined her expertise within the development, design and manufacturing of bearings, seals, and lubrication systems. These are combined with services within the remanufacturing, condition monitoring and maintenance. In fact, wherever there is rotation, there is an SKF solution at work.

Manufacturer of dosing, agitation, filtration, and processing equipment designed for the fertilizer, cement, chemistry, mine, ores, and metals market. The company offers low-maintenance industrial weighing equipment and technologies, enabling clients from heavy industries to develop and sustain the performance of their production units while reducing their downtime.

Coperion is a global industrial and technological company in the areas of compounding and extrusion machinery, sorting, shredding, and washing equipment, feeding systems, bulk material handling and services.

Coperion develops, produces, and services plants, machinery, and components for the plastics and plastics recycling industry as well as for the chemical, food, pharmaceutical, and minerals industries.

Acme Air Equipments Co. Pvt. Ltd. is a manufacturer of a variety of equipment including twin/tri lobe roots blowers, vacuum boosters, and dust collection systems. The company also provides solutions for cement feeders and catalyst unloading systems. In addition to manufacturing, Acme Air Equipments Co. Pvt. Ltd. offers engineering solutions for its products, ensuring robust, efficient, and easy-to-maintain systems. The company is ISO 9001-2015 certified, indicating a commitment to quality management and customer satisfaction

Thermax offers integrated solutions in heating, cooling, power generation, water treatment and recycle, air pollution control, and chemicals with a focus on ensuring clean air, clean energy, and clean water.

Tempsens is a leader for thermal and cable solutions. It manufactures Thermocouples, RTDs, Thermowells, Compensating cables, conductors, Calibration Equipment, Pyrometers, Industrial heaters, Industrial and R&D Furnaces, thermal imagers and related accessories. Tempsens has manufacturing units at India, Germany and Indonesia; and sales in over 70 countries. Most of the products are customised; also many standard products are available for off the shelf delivery.

Vestas aircoil

Vestas aircoil is an approved maker of heat exchangers, charge air coolers for 2 and 4 stroke engines running on a selection of fuels, compressor coolers, generator air coolers as well as a variety of other special products, most often related to cooling air. Our charge air coolers can be used for many applications such as marine, power plants, generators / alternators, compressors, gas, wind energy and offshore.

Illinois Tool Works Inc. designs and manufactures fasteners, components, equipment, consumable systems and a variety of specialty products and equipment. The company provides industrial fluids and adhesives, tooling and specialty applications, welding products and quality measurement equipment and systems. Illinois Tool Works serves customers worldwide. ITW products and solutions are used, in deep-sea oil rigs, aerospace technology, bridges and wind turbines, healthcare, homes and offices.

Lutz-JESCO America Corp. engages in the development, manufacturing, and sales of both standard and custom chemical-feed solutions for the water, wastewater, and process equipment industry.

Ebara Corporation is a Japanese company primarily known for its products in the fields of fluid handling, including pumps, compressors, and wastewater treatment systems. Founded in 1912, Ebara has grown to become a significant player in various sectors, including industrial, municipal, and environmental applications.

The company focuses on innovation and sustainability, often integrating advanced technologies into its products to improve efficiency and reduce environmental impact. Ebara also has a global presence, with operations and subsidiaries in multiple countries, serving diverse markets.

EUROWATER

A GRUNDFOS COMPANY

EUROWATER Wasseraufbereitung GmbH provides water treatment solutions. The company offers water process treatment, drinking water plant, water and energy save technology, boiler water, rinse water and others. EUROWATER Wasseraufbereitung serves clients worldwide.

With today's ever-increasing growth in consumer spending, the escalating demand for finished goods is more fervent than ever. African Pegmatite has, over the past fifty years, been instrumental in providing base minerals to the manufacturing sector, in order to transform these minerals into finished commodities.

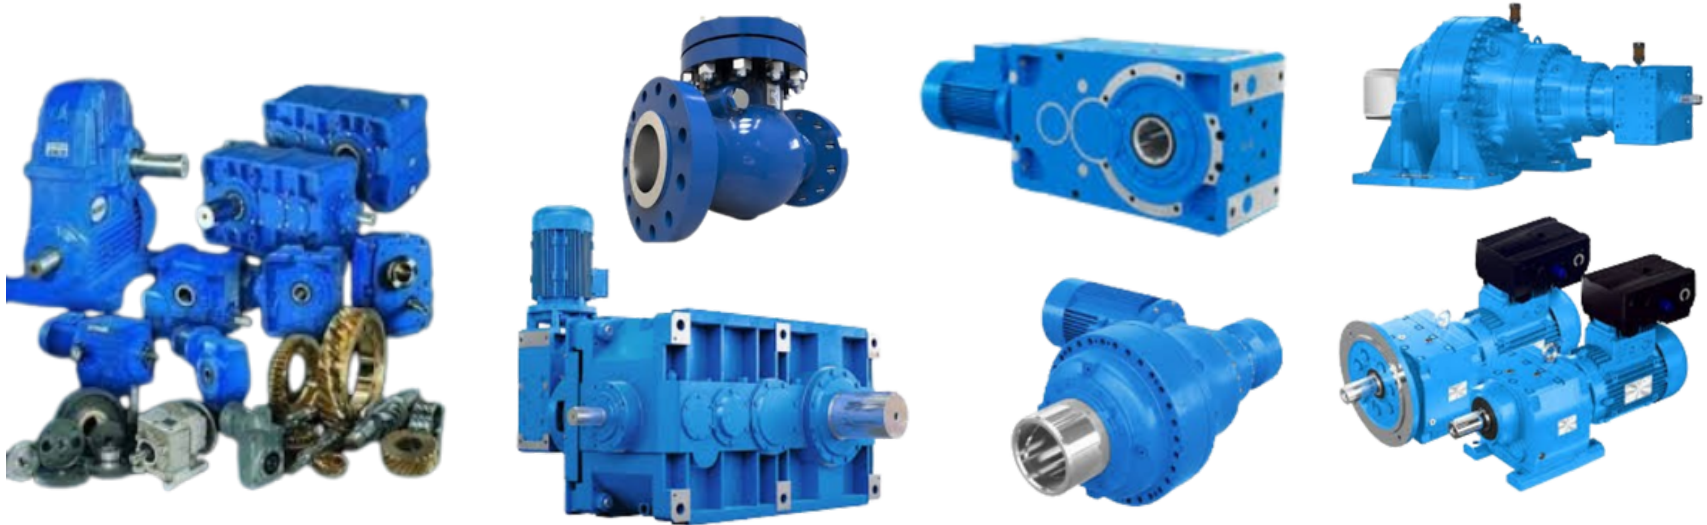

KULI Hebezeuge – Helmut Kempkes GmbH is a medium-sized, family owned company, offering a wide range of cranes and crane components for weights between 125 kg to 200 t, such as electric wire rope hoists, overhead travelling cranes, underslung cranes, gantry canes wall mounted, travelling jib cranes, electric chain hoists, standardized components, such as wheel bogies, control panels etc.

Rossi is one of Europe's largest industrial groups for the production and sales of gearboxes and gearmotors. Rossi offers a wide range of solutions for an evolving industry, flexible and innovative gearboxes and gearmotors for customer tailored solutions to maximize performance and minimize the total cost of ownership.

LTM offers a wide range of products across the UK including popular GIS Electric Chain Hoists, Control Systems, Trolleys, Flight Cases, and Manual Handling Equipment. Although they specialize in lifting products for the industrial and entertainment industries, they also provide lifting equipment and other products for companies within Engineering, Construction, Energy sectors and more.

HEKO manufacture a wide range of conveyor chains, sprockets, fastening elements and other wear parts for bulk material conveyor technology.

RU-STEEL design and produce elastic, flexible couplings always reliable and with high efficiency and standard and custom-made couplings for each specific industry application – lengths, coatings, materials, stiffnesses, dielectric insulation, ATEX, API610, API671, CU-TR10, CU-TR12, etc. certified products

Other brands

Our Services

- Project Management
- Pipeline Management System
- Procurement Support Solution
- Asset Integrity Management
- Engineering Fabrications, Repair and Maintenance
- Industrial Equipment Installation & Services
- Instrumentation & Controls
- Process Filtration Solutions
- Water & Energy Management Solutions

Projects Executed

HSE Policy

The HSE activities of Raybond Technical Ltd shall be organized, planned and executed in such a manner as to achieve the following:

1. Protect and promote the health of our work force and ensure their safety as well as that of members of the public.
2. Ensure the personal security of the workforce and that of the members of the public.
3. Avoid injury to any member of the workforce and others who are either involved in or are affected by Raybond Technical Ltd operations.
4. Protect the environment in which Raybond Technical Ltd operates from pollution and all forms of degradation.
5. Seek the co-operation, and involvement of all employees with a view to meeting the above objectives.

Occupational Health Policy

All staff shall be medically fit and shall remain medically fit throughout their employment.

Raybond Technical Ltd shall maintain insurance against any liability that may result in the event of any personnel suffering occupational disease or any impairment to health.

Company's retained clinic shall handle all routine medical and medical emergencies. "No Smoking" rule MUST be enforced.

Drug / Alcoholic addiction MUST not be encouraged amongst staff and suspected staff shall be subjected to screening / test to find out drug / alcoholic level in blood.

Health monitoring of all staff shall be a routine affair to ensure continued fitness of all staff.

First Aid box manned by a competent Nurse must be provided for field operations. Records of medications or injuries treated must be documented.

The enforcement of this policy shall be the responsibility of the HSE Manager.

QA/QC Policy

It is the company policy of RAYBOND that customers be provided with products fit for purpose and comprising components, sub-assemblies and control systems that comply with or exceed the defined contractual requirements with regard to technical specifications, reliability and quality standards.

To achieve these aims, the Company has established and maintains a quality system, which conforms to the requirements of International Standard ISO 9001 and other applicable standards in the course of our operations.

The Company requires that:-

- Personnel work in accordance with the Quality Manual, procedures, Standards and work Instructions.
- All contractual activities are planned, controlled and documented in systematic manner in accordance with the Quality Plan for each project.
- Records will be maintained to substantiate the control applied throughout each operation carried out by the company so as to provide evidence of the quality levels achieved.
- The Quality Assurance Manager manages the Raybond Technical Ltd quality programme and maintain/implement all the measures necessary to conform to the relevant standard.
